announce

**“III eGolems Biennale: a framework for Czech-Argentine reflexion
and dialogue”**

**Round Table on “The Human Person, as seen in converging perspectives
of Science, Art and Religion”**

All of the three - science, art and religion - are obviously made, taught and learned by humans and by nobody else. Humans are at the same time an important object or topic of them, however in a very different way. In the scope of the sciences, there is no place for a person, which is at the very center for the other two. If we feel an urge to seek for some convergence of these views, what would be the first steps to be made, what the preliminary conditions or requirements?

As a follow up of the meetings held in 2000 and the 1st Biennale in 2005 in Prague and the 2nd Biennale in Buenos Aires in 2007, a Round Table on “The Human Person, as seen in converging perspectives of Science, Art and Religion” will be held.

Date: November 16th, 2011
